

## **Patents Brief**

### **1. US Product Patent brief**

Title:

Mammalian colostrum derived Nano-peptides for broad-spectrum viral and recurrent infections for the treatment of AIDS.

Patent No. US,8,518,454 B2

As per the granted US Product Patent claim, “A method for the treatment of Acquired Immune Deficiency Syndrome (AIDS) the method comprising administering to a patient suffering from such disorder a therapeutically effective amount of the formulation comprising peptides of SEQ ID 1-8 in Receptol<sup>®</sup>”

### **2. Singapore patent**

Title:

Mammalian colostrum derived nano-peptide for broad spectrum viral 7 recurrent infections with method of isolation thereof

Patent No. 172793

### **3. South Africa Patent**

Title:

Mammalian Colostrum Derived Nano-peptides For Broad-spectrum Viral and Recurrent Infections with a Method of Isolation Thereof

Patent No. # 2011/04687

### **4. Europe**

Title:

Mammalian Colostrum Derived Nano-peptides for Broad-spectrum Viral and Recurrent Infections with a Method of Isolation Thereof

Application no. EP 09827010.1

Patent Status: Entered in National phase

### **5. India**

Title:

Novel Immunologically Active Peptide Fragments of Proline-Rich Polypeptide Isolated From Mammalian Colostrum For Treatment Of Viral And Non-Viral Diseases or Diseased Conditions.

Application no. 1874/MUM/08

Patent Status: Approved but not issued
