

Indian Solution to Global Health Problems Created by Covid-19 Pandemic

Dr Pawan Saharan, MS, PhD & Post Doc (WVU/Stanford) drpawan@biomix.in, WA # +91-8291084108, www.biomix.in

A new coronavirus, declared as Global Health Emergency, Covid-19 was first identified in Wuhan, the capital of China's Hubei province, after people developed SARS like pneumonia. While social distancing can help in near future but a solution to frequent outbreaks is to find a Broad spectrum Anti Viral like Receptol®. Receptol® nano- peptides can block the attachment of S protein like in case of well-studied mode of action in treatment of other retrovirus infection such as HIV over the last 12 years.

1st PHEIC was declared by WHO for Swine Flue (H1N1 Influenzas) in 2009 with 284,500 deaths with 763 million cases reported in 214 countries and was successfully contained by Receptol® used at 3 domestic & international airports in Mumbai.

The Patented Receptol® oral spray (USA Patent # US 9,249,188 B2) is a new Immunity Drug (NID) providing mode of action in a vaccine like manner with active immunity, can be used for treatment and as preventative vaccine in dealing with current 2019-nCoV epidemic. The US and global product patent: <https://patents.google.com/patent/US9249188B2/en>.

Receptol® consists of cell to cell communicator Nano informational peptides (Radha108) & Proline-Rich Polypeptides (PRPs) from Mammalian colostrum, Mother's 1st milk after birth of the child. Numerous Studies have shown that Receptol® spray will deliver nanopptide crossing blood brain barrier and have great effectiveness in treating many immunity disease including all viral infections with in 3 months.

Constituents: Active Ingredients consist of Patented Nano-Informational Peptides extracted from mammalian/ bovine colostrum via Ultra Nano filtration Technology having sequence id 1-8 & Proline Rich Poly Peptides (PRPs). As a natural product, Radha-108 Nanopeptides have no side effects which can be taken safely by all age groups and are not species specific.

USP: Innovative & affordable, globally patented, broad-spectrum antiviral, immuno-modulator, easy to administer, no side effects (100% natural) can be consumed by all, has no age or sex barrier.

Mode of Action of Receptol drastically differs from other treatments/vaccines in pipeline (current products from Gilead, Astra Zeneca, Eli Lilly, Pfizer Merck) since it blocks entry of all viruses & augments immunomodulation in unique patterns. RECEPTOL® exposes the patient's immune system to the memory of a health threat, whether foreign or native, and the knowledge of how to best respond to protect itself via building body's own immune system naturally like a new born baby is protected with mother's milk.

Receptol® showed great effectiveness in treatment of retrovirus such as HIV, Swine Flu and SARS like conditions caused by Coronavirus. An accelerated, prospective Phase III global efficacy and safety studies for Receptol® Monotherapy was conducted for HIV Positive patients with 10 years follow up showed significant resolution of all symptoms within 3 weeks including consistent week after week weight gain and pharmacological effects with low to undetectable Viral Load and increased Absolute CD4 Counts.

Receptol® oral spray can be an answer to prevent & treat current epidemic of 2019-nCoV as its Mode of Action is similar to that of AIDS for which global studies with 10 years follow were done. Receptol®'s nano-peptide will not only dock on S glycoprotein receptor on the cell surface to mitigate cell fusion through competitive inhibition, closing doors and windows for all viral entry but will also stimulate the maturation of immature thymocytes into helper & suppressor T cells. T helper cells will help produce antibodies against 2019nCoV.

Suppressor T cells, on the other hand, deactivate other lymphocytes after an infection has been cleared to avoid damage to healthy tissues. Receptol® will help to produce memory T cells, in order to expedite the production of antibodies for future infection in all human hosts like a vaccine.

The need for Receptol®, A broad spectrum Antiviral & Immunity booster from Mother's first Milk (colostrum) for better health stems from the growing awareness that prevention is the best cure from COVID-19 where perpetual lockdown of country is not the solution but lockdown of the COVID-19 virus entry to human body.

RECEPTOL® as a broad vaccine for all viruses stimulates the production of cytokines IL-1 to IL-11, TNF- α , INF- γ by stimulus from Pituitary endocrine gland in the brain via crossing the BBB – Blood-Brain Barrier being below 2k dal in size to ensure all viral infections in the body are treated by killing them immediately with no side effects and can be used from the age 0 to 100.

Medical fraternity globally have clearly stated that currently nothing is working against Covid and post immunization also prevention will remain the only method via building body's immune system since post recovery of Covid patients virus may remain life long embedded in critical organs of lung, heart, kidney and brain causing irreversible damage.

Receptol oral spray can be an answer to prevent & treat the current epidemic of 2019-nCoV as its Mode of Action is similar to that of AIDS & Swine flu as per the recent publication in the American Journal of Biotechnology & Immunology, which can be accessed: <https://escientificpublishers.com/receptol-oral-spray-shield-for-coronavirus-proposed-treatment-prevention-as-demonstrated-in-aids-JBI-02-0007>. Publications in New England Journal of Medicine, Lancet, Science & Nature are in progress.

Pls read the recent news article from US media to Covid prevention via building body's own immune system naturally and revert back asap as how we can work together to save the humanity in this pandemic that has devastated global and Indian economy.
